B.TECH – Data Science Exam Analysis Report

1. Overview

This report analyzes the results of the **B.TECH Data Science exam** to evaluate student performance and identify the overall academic level of the class.

The analysis is based on results from **43 students**.

---

2. Overview of Results

Metric	Value
Total Students	**43**
Average Score	**7.67**
Highest Score	**12**
Lowest Score	**4**

Insight

- The **average score (7.67)** indicates that the overall performance of the class is **below the expected level**.
- The difference between the **highest score (12)** and **lowest score (4)** shows that very few students achieved high marks.

---

3. Attendance and Pass Rate Analysis

Category	Students	Percentage
Pass	**5**	**11.63%**
Fail	**31**	**72.09%**
Absent	**7**	**16.28%**

Insight

- The **pass rate is only 11.63%**, which is extremely low.
- The majority of students (**72%**) failed the exam.
- **7 students were absent**, which also impacts the overall evaluation of class performance.

---

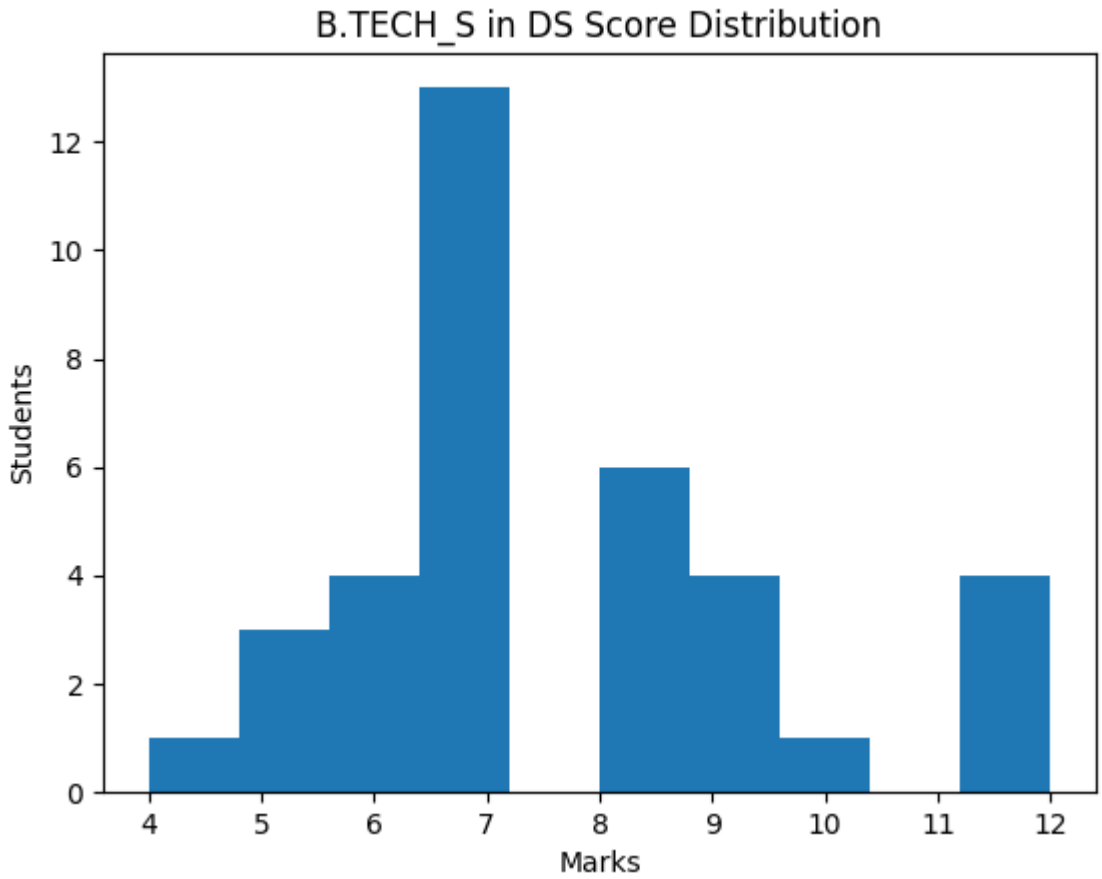
4. Performance Categories

Students were classified into three performance levels:

Level	Students	Percentage
Strong	**0**	**0%**
Average	**5**	**11.63%**
Weak	**31**	**72.09%**

Insight

- No students achieved the **strong performance level**.
- Only **5 students (11.63%)** reached the **average level**.
- The majority of students (**72%**) fall into the **weak category**, indicating significant learning difficulties.



5. Score Distribution Analysis

Figure 1: Distribution of Students Scores in B.TECH Data Science Exam

Key Observations

- Most scores are concentrated between **6 and 9 marks**.
- Very few students scored above **10 marks**.
- The distribution indicates that **overall academic performance is relatively low**.

6. Key Findings

1. The **average score (7.67)** indicates weak academic performance.
2. The **pass rate is very low (11.63%)**.
3. No students achieved **high performance**.
4. The majority of students fall into the **weak performance category**.

---

7. Recommendations

To improve future results:

- Provide **additional support classes** for weak students.
- Increase **practical exercises and assignments** in Data Science.
- Conduct **review sessions before exams** to strengthen students' understanding.
- Encourage students to practice **real-world data analysis problems**.
