Java Course – Sessional 1 Exam Analysis Report

1. Overview

This report analyzes the results of the **Sessional-1 Java Exam** to understand students' performance, identify strengths and weaknesses, and evaluate the overall pass rate.

The analysis is based on exam scores from **41 students**.

---

2. Overview of Results

Metric	Value
Total Students	**41**
Average Score	**11.76**
Highest Score	**20**
Lowest Score	**0**

Insight

- The **average score (11.76)** indicates that overall performance is **moderate**.
- The gap between **highest (20)** and **lowest (0)** shows a **wide variation in student performance**.

---

3. Pass / Fail Analysis

Category	Students	Percentage
Pass	26	63.41%
Fail	15	36.59%

Insight

- About **63% of students passed the exam**, which suggests acceptable performance.

- However, **36% failure rate** indicates that a significant portion of students struggled with the exam material.

---

4. Performance Categories

Students were grouped into three performance levels:

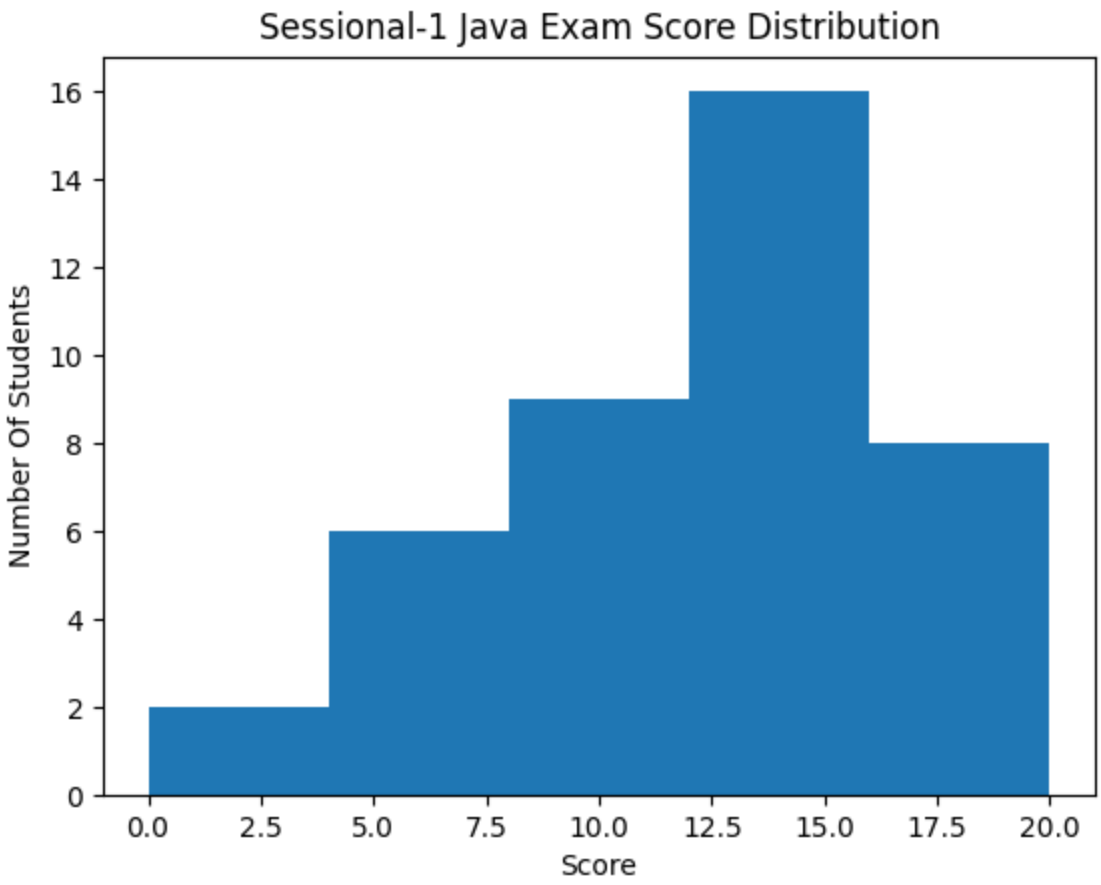
Level	Students	Percentage
Strong	**8**	**19.51%**
Average	**18**	**43.90%**
Weak	**15**	**36.59%**

Insight

- The **largest group is Average students (43.9%)**, indicating most students have a moderate understanding of the material.

- **Weak students represent 36.6%**, which aligns with the failure rate and highlights the need for additional support.

- Only **19.5% of students are strong performers**, showing room for improvement in high-level mastery.



5. Score Distribution Analysis

The histogram visualization shows how scores are distributed across different ranges.

Key Observations

- Most scores are concentrated between **10 and 16**.
-
- Few students achieved **very high scores near 20**.
-
- Some students scored **below 5**, indicating serious difficulties with the exam.

---

6. Key Findings

1. The **overall performance is moderate** with an average score of **11.76**.
2. The **pass rate is 63%**, but more than one-third of students failed.
3. A significant portion of students fall into the **weak performance category**.
4. Only a small percentage of students demonstrate **strong mastery of Java concepts**.

---

7. Recommendations

To improve future performance:

- Provide **additional practice sessions** for weak students.
- Conduct **revision classes** before exams focusing on difficult topics.
- Encourage students to complete **more coding exercises and practical assignments**.
- Identify common mistakes from exam answers and review them in class.
